SKILLS

- Javascript
- HTML
- CSS
- Bootstrap
- MySQL
- C++
- Python
- React

EDUCATION

Intermediate(Concordia
College)
2017-2019
Got 85%

Bachelor's In Computer
Science(UMT)
2021-2025
3.28 CGPA (Currently)

Summary

Motivated and detail-oriented Computer Science student with a strong foundation in Python, JavaScript, and SQL. Proficient in modern web development using the MERN stack and experienced in building dynamic, full stack applications. Skilled in database design, algorithm implementation, and problem-solving through hands-on, project-based learning. A fast learner with excellent analytical abilities and a keen passion for developing efficient, scalable, and user-centric software solutions.

WORK EXPERIENCE

Intern Software Engineer at PITB

Aug 2025 to Oct 2025

- Developed and maintained a data-driven dashboard using the MERN stack (MongoDB, Express.js, React, Node.js) to display real-time data insights. Designed and integrated RESTful APIs to efficiently fetch and update data in MongoDB, ensuring consistent data flow across the application.

FINAL YEAR PROJECT (FYP)

– AI-Based HR Management System

Currently working on the development of an AI-powered Human Resource Management System as part of the Final Year Project. The system integrates both multi-page and single-page web architectures to deliver a seamless user experience.

Tech Stack: MERN (MongoDB, Express.js, React.js, Node.js),
Generative AI tools/APIs

Key Features:

- Developed full CRUD operations for employee, department, and performance management.
- Integrated Generative AI for resume parsing, job description generation, and smart recommendations.
- Designed responsive, user-friendly UI with React.js.
- Built secure backend APIs using Node.js, Express, and MongoDB.
- Implemented role-based authentication and access control.
